

Multiplication

► If you change the order of the factors, you have the same product.

1. $7 \times 3 = \underline{\quad}$

$3 \times 7 = \underline{\quad}$

2. $6 \times 5 = \underline{\quad}$

$5 \times 6 = \underline{\quad}$

3. $2 \times 3 = \underline{\quad}$

$3 \times 2 = \underline{\quad}$

4. $4 \times 6 = \underline{\quad}$

$6 \times 4 = \underline{\quad}$

5. $2 \times 9 = \underline{\quad}$

$9 \times 2 = \underline{\quad}$

6. $8 \times 4 = \underline{\quad}$

$4 \times 8 = \underline{\quad}$

7. $7 \times 2 = \underline{\quad}$

$2 \times 7 = \underline{\quad}$

8. $3 \times 6 = \underline{\quad}$

$6 \times 3 = \underline{\quad}$

9. $9 \times 4 = \underline{\quad}$

$4 \times 9 = \underline{\quad}$

10. $8 \times 3 = \underline{\quad}$

$3 \times 8 = \underline{\quad}$

11. $5 \times 2 = \underline{\quad}$

$2 \times 5 = \underline{\quad}$

12. $9 \times 3 = \underline{\quad}$

$3 \times 9 = \underline{\quad}$
