

Find the value of n . Then find the value of m .

1 $6 \xrightarrow{-2} n \xrightarrow{\times 4} m$

$n = \underline{\hspace{2cm}}$

$m = \underline{\hspace{2cm}}$

2 $8 \xrightarrow{\times 3} n \xrightarrow{\div 4} m$

$n = \underline{\hspace{2cm}}$

$m = \underline{\hspace{2cm}}$

3 $7 \xrightarrow{+7} n \xrightarrow{\div 2} m$

$n = \underline{\hspace{2cm}}$

$m = \underline{\hspace{2cm}}$

4 $5 \xrightarrow{-2} n \xrightarrow{\times 3} m$

$n = \underline{\hspace{2cm}}$

$m = \underline{\hspace{2cm}}$

5 $m \xleftarrow{\times 4} n \xleftarrow{+5} 0$

$n = \underline{\hspace{2cm}}$

$m = \underline{\hspace{2cm}}$

6 $2 \xrightarrow{+52} n \xrightarrow{\div 6} m$

$n = \underline{\hspace{2cm}}$

$m = \underline{\hspace{2cm}}$

7 $m \xleftarrow{\div 5} n \xleftarrow{\times 10} 4$

$n = \underline{\hspace{2cm}}$

$m = \underline{\hspace{2cm}}$
