7. Megan's father is driving Megan and 13 of her teammates to a basketball game. Megan's father will have to make several trips. His car can carry himself and 4 passengers.

Part A

How many players does Megan's father need to take to the game?

Answer:_____

Part B

How many round trips must Megan's father make?

Answer:_____

8. **⚑ Use your pattern blocks to help you solve this problem.**
Nadia used pattern blocks to draw half of a design. The dotted line shows the line of symmetry. Complete the design below by tracing around your pattern blocks.
