

A Growing Puppy

A **line graph** is often used to show how something changes over time. Ashley recorded the weight of her German shepherd puppy over 10 months. The data is displayed on the line graph. Study the graph. Then answer the questions below.

1. What was the puppy's weight at seven months? _____
2. At what age did the puppy weigh 31 pounds? _____
3. About how much weight did the puppy gain from the age of one month to the age of two months?

4. True or false: The dog gained weight every month shown on the graph. _____
5. How much do you think the dog will weigh when it is one year old? Explain your prediction. _____
