

Picnic Area

What to Do:

Area measures the number of square units inside a shape. Find the area of each ant family's picnic blanket by counting the number of squares on the blanket. Then answer the following questions.

Remember—area is measured in square units, such as square centimeters. My blanket's area is four square units.

1. Which pairs of blankets have the same area?

_____ and _____

_____ and _____

_____ and _____

2. Which two blankets can you put together to make a rectangle with an area of 20?

3. Which three blankets can you put together to make a rectangle with an area of 50?

4. What is the total area of all of the ants' blankets?
