

The Princess's Jewels

Princess Gaudylocks has so many jewels that she has a hard time keeping track of them. Help the Princess's maid clean up the royal jewelry box.

1. The maid found 4,382 diamonds. She knew she found 1,265 of them under the royal bed and 1,637 in the royal bathroom. How many did she find in the royal jewelry box?

2. The maid finally found all 3,957 emeralds. She found 2,007 in the royal wastebasket and 368 in the royal dresser. How many emeralds did she find in the royal jewelry box?

3. The maid found a total of 6,184 rubies. She found 2,386 in the royal coffee cup and 2,631 in the royal teapot. How many rubies did she find in the royal jewelry box?

4. The maid found a total of 5,307 sapphires. She found 1,768 in the royal closet and 2,003 in the royal bathtub. How many sapphires did she find in the royal jewelry box?

5. The maid found a total of 7,284 opals. She found 3,196 in the royal slippers, 1,538 in the royal stereo, and 622 in the royal chamber pot. How many opals did she find in the royal jewelry box?
